

Our Mission

is to prepare all of our students to lead lives of joy and purpose as knowledgeable, creative and passionate citizens of a global society.

To achieve this mission, we strive to stay true to our overarching values:

- ▶ Our schools are places of **partnership** where educators work closely with one another, where relationships with families are forged, and where collaborations with individuals and organizations across our community and throughout the world support the highest levels of teaching and learning.
- ▶ Our schools are places of **innovation** where curiosity is sparked, risk-taking is encouraged, and where problems are viewed as opportunities for deeper understanding and creative solutions.
- ▶ Our schools are places of **care** where every child is known, every culture valued, and where kindness and courage are modeled.
